Configuring & Monitoring NetApp E-Series Storage Systems

CODE:

LENGTH:

PRICE:

NEP_ES-SS-CM

32 Hours (4 dage)

kr 27,800.00

Description

In this course, you learn how to recommend configurations based on a pre-deployment assessment for a new NetApp E-Series or EF-Series storage system. In the deployment phase, you use both the NetApp SANtricity® storage management and system management software to create the configuration, perform administrative tasks, and employ data protection features. During post-deployment, you use SANtricity system management software to collect storage system information for trend analysis, troubleshooting, performance monitoring, and tuning.

Objectives

This course focuses on enabling you to do the following:
• Identify and use administrative and support tools for E-Series storage systems
• Install SANtricity Storage Manager software on a host platform
• Recommend and create logical configurations on E-Series storage systems
• Manage volume group and dynamic disk pools using SANtricity System Manager
• Perform routine E-Series administrative tasks using SANtricity System Manager
• Configure and administer E-Series features such as SANtricity Snapshot image, volume copy, and mirroring technologies
• Collect E-Series storage system information such as the event log, profile, and support bundle

Audience

This course is designed for Professional Services workers who are NetApp employees, NetApp partners, or NetApp customers.

Prerequisites

Basic Windows administrative experience plus technical Overview of NetApp E-Series Storage Systems

Programme

E-Series and EF-Series storage products
SANtricity management interfaces
SANtricity storage manager
SANtricity unified manager
Module 1: Introduction to E-Series and EF-Series Storage System manger overview
Configuration and I/O Operations
Cache and battery operation
Data assurance
Media scan
Module 2: E-Series and EF-Series Functionality Drive security
Host-Side configuration concepts
Disk-side configuration concepts
Pool and volume group configuration concepts
Initial setup steps
Module 3: Configuration Concepts and Initial Setup Additional setup steps
Volume groups
Creating volume groups and volumes
System administration tasks
Module 4: Volume Group Administration Managing volume group disks   **Module 5: Pools Administration**

Pools
Creating unsecured disk pools and volumes
Creating secure pools
System administration tasks
Managing disk pool disks

SSD Cache overview

Module 6: SSD Cache Administration SSD Cache administration

The SANtricity Snapshot Feature
Snapshot administration
Snapshot volume operational sequences
Snapshot volume administration

Module 7: Snapshot Administration Snapshot consistency group administration   **Module 8: Copy Volume Function**

Mirroring technology
Synchronous mirroring
Synchronous mirroring administration
Asynchronous mirroring
Asynchronous mirroring administration

Copy volume function overview
Copy volume administration   **Module 9: Mirroring Administration** SANtricity feature considerations

Resources for collection and monitoring
Storage array component information
AutoSupport support tool
Informational files

Module 10: Data Collection and Monitoring Performance monitoring   **Module 11: General Administrative Tasks**
General administrative tasks
Alert management
Storage array, controller and drive tasks
Managing upgrades

Test and Certification

This course is part of the NetApp Certified Implementation Engineer (NCIE) – SAN Specialist (E-Series) certification

Session Dates

Date	Location	Time Zone	Language	Type	Guaranteed	PRICE
19 Aug 2024	Virtual Classroom (GMT / UTC)	BST	English	Instructor Led Online		kr 27,800.00
07 Oct 2024	Virtual Classroom (GMT / UTC)	BST	English	Instructor Led Online		kr 27,800.00
