## Description

The Symantec Endpoint Protection 14.x Administration R1 course is designed for the network, IT security, and systems administration professional in a Security Operations position tasked with the day-to-day operation of the SEPM on-premise management console and with configuring optimum security settings for endpoints protected by Endpoint Protection.

## Lernziel

By the completion of this course, you will be able to:

- Describe how the Endpoint Protection Manager (SEPM) communicates with clients and make appropriate changes as necessary.
- Design and create Endpoint Protection group structures to meet the needs of your organization.
- Respond to threats using SEPM monitoring and reporting. Analyze the content delivery system (LiveUpdate).
- Configure Group Update Providers. Create location aware updates. Secure endpoints against network and file-based threats.
- Control endpoint integrity and compliance. Enforce an adaptive security posture.

## Voraussetzungen

This course assumes that students have a basic understanding of advanced computer terminology, including TCP/IP networking and Internet terms, and an administrator-level knowledge of Microsoft Windows operating systems.

## Inhalt

Module 1: Managing Console Access and Delegating Authority	
Creating Administrator Accounts	
Managing Administrator Accounts	
Configuring Directory Server Authentication for an Administrator Account	Module 2: Managing Client-to-Server Communication
Analyzing Client-to-SEPM Communication	
Restoring Communication Between Clients and SEPM	
Verifying Clients are Online with the SEPM	Module 3: Managing Client Architecture and Active Directory Integration
Describing the Interaction Between Sites, Domains, and Groups	
Managing Groups, Locations, and Shared Policies	
Importing Active Directory Organizational Units (OUs)	
Controlling Access to Client User Interface Settings	Module 4: Managing Clients and Responding to Threats
Introducing the Clients View	
Monitoring SEP Clients Using the Clients View	
Responding to Incidents Using the Clients View	Module 5: Monitoring the Environment and Responding to Threats
Monitoring Critical Log Data Using the Summary page	
Identifying New Incidents Using the Logs Page	
Monitoring Actions Sent to Clients Using the Command Status View	
Configuring Notifications	Module 6: Creating Incident and Health Status Reports

	Introducing Device Control
	Windows Device Control Concepts
	Mac Device Control Concepts
	Configuring Device Control
Module 20: Restricting Device Access for Windows and Mac Clients	Monitoring Device Control Events
	Describing System Lockdown
	Creating and Managing the File Fingerprint List
Module 21: Hardening Clients with System Lockdown	System Lockdown use cases
	Creating Locations
	Adding Policies to Locations
Module 22: Customizing Protection Based on User Location	Monitoring Location Awareness
	Describing Security Exceptions
	Describing Automatic Exclusions
	Managing Exceptions
Module 23: Managing Security Exceptions	Monitoring Security Exceptions

## Weiterführende Kurse

Students interested in Administration of Symantec endpoints utilizing the cloud management interface available as part of Symantec Endpoint Security Complete should take the following course:

Symantec Endpoint Security Complete Administration R1

## Test und Zertifizierung

250-428: Administration of Symantec Endpoint Protection 14
