Description

In this three-day course, candidates will learn how to use FortiSIEM, and how to integrate FortiSIEM into your network awareness infrastructure.

Candidates will learn about initial configurations, architecture, and the discovery of devices on the network. Candidates will also learn how to collect performance information and aggregate it with syslog data to enrich the overall view of the health of the environment. Additionally, candidates will learn how you can use the configuration database to greatly facilitate compliance audits.

Objetivos

After completing these courses, candidates will be able to:

- Identify business drivers for using SIEM tools
- Describe SIEM and PAM concepts
- Describe key features of FortiSIEM
- Understand how collectors, workers, and supervisors work together
- Configure notifications
- Create new users and custom roles
- Describe the discovery process
- Enable devices for discovery
- Understand when to use agents
- Perform real-time, historic, and structured searches
- Group and aggregate search results
- Examine performance metrics
- Create custom incident rules
- Edit existing, or create new, reports
- Configure and customize the dashboards
- Export CMDB information

Público

Anyone who is responsible for day-to-day management of FortiSIEM.

Requisitos Previos
