VMware Tanzu Mission Control: Management and Operations 2020

CODE:	LENGTH:	PRICE:
VMW_TCMCO2020	8 Hours (1 day)	Request Price

Description

During this one-day course, you focus on using VMware Tanzu™ Mission Control™ to provision and manage Kubernetes clusters. The course covers how to manage on-premise and cloud-based Kubernetes clusters and how to apply access, image registry, and network policies to clusters.

Objectives

- By the end of the course, you should be able to meet the following objectives:
- Describe the Tanzu Mission Control architecture
- Configure user and group access
- Create and manage Kubernetes clusters
- Create access, image registry, and network policies
- Monitor cluster health and perform cluster inspections

Audience

VI administrators or application owners who are responsible for deploying and managing Kubernetes clusters and workloads

Prerequisites

- Working knowledge of Kubernetes.
- Working knowledge of Amazon Web Services (AWS) is beneficial if you intend to deploy Kubernetes clusters on AWS.

Programme

- 1 Introducing VMware Tanzu Mission Control
- VMware Tanzu Mission Control
- Accessing Tanzu Mission Control
- Access control Architecture
- 2 Policy-Driven Cluster Management
- Policy-Driven Cluster Management
- Access Policies
- Image Registry Policies
- Network Policies
- Network Policies
- 3 Cluster Management
- Attached Clusters
- Cloud Provider Accounts
- Provisioned Clusters
- Cluster Health
- Cluster Inspections
