# VMware Tanzu Mission Control: Management and Operations 2020

<b>CODE:</b>	<b>LENGTH:</b>	<b>PRICE:</b>
VMW_TCMCO2020	8 Hours (1 day)	Request Price

## Description

During this one-day course, you focus on using VMware Tanzu™ Mission Control™ to provision and manage Kubernetes clusters. The course covers how to manage on-premise and cloud-based Kubernetes clusters and how to apply access, image registry, and network policies to clusters.

## Objectives

By the end of the course, you should be able to meet the following objectives:

- Describe the Tanzu Mission Control architecture
- Configure user and group access
- Create and manage Kubernetes clusters
- Create access, image registry, and network policies
- Monitor cluster health and perform cluster inspections

## Audience

VI administrators or application owners who are responsible for deploying and managing Kubernetes clusters and workloads

## Prerequisites

- Working knowledge of Kubernetes.
- Working knowledge of Amazon Web Services (AWS) is beneficial if you intend to deploy Kubernetes clusters on AWS.

## Programme

1 Introducing VMware Tanzu Mission Control • VMware Tanzu Mission Control • Accessing Tanzu Mission Control • Access control Architecture 2 Policy-Driven Cluster Management • Policy-Driven Cluster Management • Access Policies • Image Registry Policies • Network Policies • Network Policies 3 Cluster Management • Attached Clusters • Cloud Provider Accounts • Provisioned Clusters • Cluster Health • Cluster Inspections
