Power Systems for AIX - Virtualization III: Implementing Shared Storage Pools

CÓDIGO:	DURACIÓN:	Precio:
AN32G	3 días	€2,100.00

Description

This course provides the implementation and management skills to create Virtual I/O Server (VIOS) storage groups and shared storage pools on IBM Power Systems. Students learn to create a VIOS storage group, manage storage in the shared storage pool, provision storage to client partitions using either thick or thin provisioning, mirror the shared storage pool, create and use snapshots, and manage the VIOS storage group configuration by learning how to do backups, restores, and software upgrades.

Objetivos

- Configure a Virtual I/O Server storage group and a shared storage pool
- Manage physical volumes in the shared storage pool
- Create and manage logical units in the shared storage pool
- Allocate storage to client partitions using thick or thin provisioning
- Configure the shared storage pool alert thresholds
- Mirror the shared storage pool
- Create, use, and manage storage snapshots
- Back up and restore a VIOS storage group configuration

Público

This advanced course is for anyone responsible for implementing and managing virtualization features on an IBM Power Systems server including:

- AIX technical support individuals
- System administrators
- Systems engineers, and
- System architects

Requisitos Previos

You must already know the basics of configuring and managing a Virtual I/O Server **and** virtual devices, including file-backed devices. This prerequisite can be met by attending the following course:

- *Power Systems for AIX - Virtualization I: Implementing Virtualization (AN30G)*

or have equivalent LPAR **and** Virtual I/O Server skills.

Programa

Day 1

- Welcome
- Unit 1 - Virtual I/O Server storage groups overview
- Exercise 1 - Virtual I/O Server shared storage groups overview
- Unit 2 - Configuring Virtual I/O Server storage groups
- Exercise 2 - Configuring Virtual I/O Server storage groups

Day 2

- Unit 3 - Configuring the shared storage pool
- Exercise 3 - Configuring the shared storage pool
- Unit 4 - Managing client storage
- Exercise 4 - Managing client storage
- Unit 5 - Thick and thin provisioning

Day 3

- Exercise 5 - Thick and thin provisioning
- Unit 6 - Mirroring the shared storage pool
- Exercise 6 - Mirroring the shared storage pool
- Unit 7 - Managing Virtual I/O Server storage groups
- Exercise 7 - Managing Virtual I/O Server storage groups
- Wrap up / Evaluations

Más información

Prior to enrolling, IBM Employees must follow their Division/Department processes to obtain approval to attend this public training class. Failure to follow Division/Department approval processes may result in the IBM Employee being personally responsible for the class charges.

GBS practitioners that use the EViTA system for requesting external training should use that same process for this course. Go to the EViTA site to start this process: <http://w3.ibm.com/services/gbs/evita/BCSVTEnr1.nsf>

Once you enroll in a GTP class, you will receive a confirmation letter that should show:

- The current GTP list price
- The 20% discounted price available to IBMers. This is the price you will be invoiced for the class.

Fechas Programadas

A petición. Gracias por contactarnos.
