Implementing AIX 7 Security

CÓDIGO:	DURACIÓN:	Precio:
AN58G	24 Hours (3 días)	€2,100.00

Description

This course is designed to help implement a security policy in an AIX environment. Students will learn the security features of AIX including administrative commands and components such as Role Based Access Control and Trusted Execution, to secure the operating environment from security threats.

This course provides lectures and hands on labs in an instructor lead course environment, either in a face-to-face classroom or in a live virtual classroom environment (ILO - Instructor Led Online).

Objetivos

- Describe security threats to a computer system
- Describe the AIX commands and components for AIX system security
- Configure the role-based access control (RBAC) feature
- Implement encrypted file systems
- Implement the Trusted Execution feature
- Centralize security with LDAP
- Implement the AIX installation time options of Secure by Default and Trusted AIX

Público

The audiences for this advanced training include AIX technical support individuals, system administrators, system architects, engineers, and anyone who need an understanding of the security features of AIX.

Requisitos Previos

Students should have basic AIX administration experience. The AIX prerequisite may be met by attending one of the following courses or having equivalent AIX skills: • Power Systems for AIX II AIX Implementation and Administration (AN12G) or (AX12G) • Jumpstart for UNIX Professionals (AN14G)

Programa

AIX security features AIX base system security Role-based access control Encrypted file systems Trusted Execution
LDAP Implementing security features at AIX installation

Fechas Programadas

A petición. Gracias por [contactarnos](#).
